

## ACDelco Filter Range Expansion

ACDelco is pleased to advise that we have significantly expanded our Filter range to provide customers with an improved coverage in this important market segment.

We have added 59 new filters covering some additional 377 applications across oil, air, fuel and cabin filters to the ACDelco Program. For a comprehensive listing of these new part numbers and their applications, please click on the following link:

It's also appropriate to highlight some of the main features and benefits of ACDelco Filters:

- The range of ACDelco Oil, Air, Cabin and Fuel Filters meet or exceed original equipment requirements.
- All ACDelco Filters use world-class design, technology and engineering processes.
- All ACDelco filters are manufactured to the demanding TS16949 quality standard in QS9000 and ISO9001/2 accredited facilities.
- All raw materials used in ACDelco filters are thoroughly tested to ensure compliance to specifications.
- Every ACDelco filter design is tested to meet customer expectations for form, fit and function.
