

Remanufactured Steering fit with confidence!

All ACDelco steering racks and boxes are remanufactured not reconditioned, and each part endures a mandatory quality check and is fitted with the latest refinements.

FEATURES & BENEFITS:

- / ACDelco remanufactured steering pumps and steering racks are fully remanufactured and thoroughly tested to meet the OE manufactures specification.
- / All designated high risk parts are replaced with new parts whether worn or not.
- / All electronic controlled steering racks come fitted with new solenoids/switches.
- / Critical pump applications are supplied with a power steering return hose.
- / Only genuine OE components are used in the remanufacturing process.
- / Each steering gear must pass a minimum of five separate tests to attain the ACDelco remanufactured standard.

ACDelco offers a comprehensive Product Range to suit Most Makes & Models.

Remanufactured Steering

There is a significant difference between the reconditioning of a steering gear and the complete remanufacturing of a steering gear.

WHAT IS RECONDITIONING?

Typically reconditioning involves locating the problem e.g. a leaking pinion seal or power chamber seal, replacing that component then adjusting the gear to remove any obvious movement or slack in the centre position in the steering gear.

THE ACDELCO REMANUFACTURING PROCESS:

- / Gears are completely dismantled.
- / All tie rods, boots and seals are discarded.
- / All teflon seals are removed and discarded.
- / The pinion and valve assembly is dismantled and rebalanced.
- / The housing and rack & piston are checked for cracks and discarded if cracks are detected.
- / Gears are rebuilt to the OE specification.
- / All bent or damaged components are discarded.
- / All seals, teflons, tie rods and boots are replaced with new genuine OE components.
- / If the pinion shows excessive wear, pitting or is cracked it is replaced.
- / Each gear is tested for leaking, attainment of correct pressure between chambers, returnability, elimination of light/heavy sensation.
